EGYPTIAN COTTON NEWS LETTER  
(Not for publication)

Egyptian Cotton Breeding, Bureau of Plant Industry  
U. S. Department of Agriculture

The information contained in this News Letter is drawn mainly from newspapers and trade journals, the published source of the information being given in every case. The object of the letter is to furnish information to officials and cooperators of the Department of Agriculture in regard to the condition of the market for long staple cotton. The Department assumes no responsibility for the accuracy and reliability of these quoted statements, and under no circumstances should they be republished as having been issued by the Department of Agriculture.

LONG STAPLE COTTON MARKET CONDITIONS

The New Bedford Sunday Standard-Times of October 29 states as follows:

"Extra staple cotton markets put in another quiet week in New England though continued demand in some of the southern centers served to firm up the quoted market slightly. Wide variations in prices were reported in some types, the variance being sometimes as much as 30 to 50 points. The medium length extra staple types were the ones chiefly affected by the price stiffening, but this was not accompanied by any very substantial mill buying.

"Current quotations based on December futures, F.O.B. New Bedford, are given herewith for strict low middling, for middling and for strict middling cotton classed on government standards:

Inch and 1/8th - 200 to 225; 290 to 325; 375 to 400.  
Inch and 3/16ths - 300 to 325; 440 to 475; 550 to 600.  
Inch and 1/4th - 450 to 500; 600 to 675; 725 to 775."

THE CROP IN EGYPT

"Cotton" of Manchester, issue of October 7, 1939 contains the following dispatch from the Alexandria Commercial Co., of Alexandria, dated September 15:

Picking continues under normal conditions in Upper Egypt. The general impression is that the acreage is slightly inferior to last year. Up to the present the quality of the crop on the whole appears to be good.

In Lower Egypt the climatic conditions have been favourable. Picking is general everywhere and continues normally. There has been no increase in the pink bollworm attacks.

The information contained in this News Letter is drawn mainly from newspapers and trade journals, the published source of the information being given in every case. The object of the letter is to furnish information to officials and cooperators of the Department of Agriculture in regard to the condition of the market for long staple cotton. The Department assumes no responsibility for the accuracy and reliability of these quoted statements, and under no circumstances should they be republished as having been issued by the Department of Agriculture.

LONG STAPLE COTTON MARKET CONDITIONS

The New Bedford Sunday Standard-Times of November 5 states as follows:

"President Roosevelt's expressed opposition to government loans on the 1939 cotton crop, plus the heavy movement of the crop onto the market caused heavy selling pressure upon the various shorter cotton types as farmers hastened to turn their bales into cash, and the result was badly demoralized prices for nearly all the shorter cottons during the past week. Spot prices were all over the lot in practically all New England cotton marketing centers, but the longer staple types held relatively firm in spite of the heavier offerings.

"Current quotations on strict low middling, on middling and on strict middling cotton on government standards and based on December futures are given herewith, F.O.B. New Bedford:

Inch and 1/8th - 175 to 200; 240 to 275; 290 to 325.  
Inch and 3/16ths - 325 to 375; 450 to 500; 550 to 600.  
Inch and 1/4th - 475 to 550; 650 to 700; 750 to 800."

The Department assumes no responsibility for the accuracy and reliability of these quoted statements, and under no circumstances should they be republished as having been issued by the Department of Agriculture.

LONG STAPLE COTTON MARKET CONDITIONS

The New Bedford Sunday Standard-Times of November 26 states as follows:

"Buying interest was better in extra staple cotton markets during the past week, but actual sales were still rather limited, and prices were about the same as the previous week.

"In spite of the full weight of the crop now coming into the southern markets, shippers report it is difficult to find sizable offerings of long staple cotton, and nearly all quotations on cotton longer than inch and five thirty-seconds were tentative only and subject to confirmation.

"Current quotations on prompt shipment cotton classed on government standards and based on December futures are nominally as follows for strict low middling, for middling and for strict middling, F.O.B. New Bedford:

Inch and 1/8th - 185 to 210; 250 to 285; 295 to 325.  
Inch and 3/16ths - 335 to 400; 475 to 500; 550 to 600.  
Inch and 1/4th - 475 to 550; 650 to 700; 750 to 800."
